RAKESH G

Data Analyst | BCA (AI & Data Science) Student

Chennai, India | rakee4407@gmail.com | github.com/rakesh4407 | linkedin.com/in/rakesh-bca

SUMMARY

BCA (AI & Data Science) student (CGPA 9.22/10) with hands-on experience in data analytics and machine learning through a Data Science internship and three end-to-end analytics projects covering EDA, dashboarding, and predictive modeling. Skilled in Python, SQL, Pandas, and Power BI, with experience turning data into actionable business insights.

EXPERIENCE

Data Science Intern — The SSL Lock, Chennai *June 2025 & June 2026*

- Built a full-stack SSL certificate renewal dashboard (PHP, Python, MySQL) to automate certificate monitoring and renewal tracking for the organization.
- Developed a Python-based TLS scanner to automatically extract certificate metadata (issuer, validity, expiry) across client domains, replacing manual spreadsheet tracking.
- Performed data cleaning, EDA, and visualization using Python, Pandas, and Matplotlib to support predictive analysis and reporting.

PROJECTS

Regional Sales Analysis | Python, Pandas, Matplotlib, Seaborn, Power BI | GitHub

- Analyzed 4 years of US regional sales data to identify that the Export channel, despite only 15% of volume, delivered the highest profit margin (~38%), informing a key growth recommendation.
- Built an interactive Power BI dashboard to track revenue, profit, and budget variance for ongoing business monitoring.

SSL Certificate Renewal Dashboard | PHP, Python, MySQL, Chart.js | GitHub

- Designed a full-stack dashboard to centralize SSL certificate tracking, with role-based login and a live analytics view of certificates by expiry status.
- Automated certificate risk categorization (Critical/Urgent/Reminder) and built Excel import/export for bulk certificate data handling.

Customer Churn Prediction & Retention Analytics | Python, Flask, scikit-learn, Pandas | GitHub

- Built a Random Forest churn prediction model on 7,000+ telecom customer records, with a real-time prediction tool and confidence scoring.
- Developed an analytics dashboard with KPI cards and feature-importance visualizations to explain key churn drivers to non-technical users.

EDUCATION

BCA (Artificial Intelligence & Data Science) — K.R. Mangalam University, Haryana *2024 – 2027*

CGPA: 9.22 / 10

SKILLS

Programming: Python, SQL, R, Java, C++

Data Analytics: Pandas, NumPy, Data Cleaning, EDA, Matplotlib, Seaborn

Visualization & BI: Power BI, Excel

Databases & Tools: MySQL, MongoDB, Git, Flask

Machine Learning: Scikit-learn, Predictive Modeling

Web: HTML, CSS, JavaScript

ACHIEVEMENTS & CERTIFICATIONS

- Top 15 — Inter-college Hackathon on Social Innovation (2025)
- IBM — Data Analysis with Python | Cognitive Class, IBM Developer Skills Network — Oct 2024
- IBM — Data Visualization with Python | Cognitive Class, IBM Developer Skills Network — May 2025
